

Position Title: Microencapsulation Chemist

About Sensonics: Sensonics International provides the medical, scientific, and industrial communities with the best smell and taste tests for assessing chemosensory function. Since its founding, Sensonics has developed multiple taste and smell tests incorporating microencapsulation and other technologies.

Job Summary: Sensonics has a position opening for a chemist with experience in the development of microencapsulated ink slurries employed in flexographic printing of odorized labels. Opportunity to independently develop and maintain own section at Sensonics International, the world's largest manufacturer of smell and taste testing products.

Qualifications: Experience in microencapsulation technology and chemicals. Master's degree or PhD in Chemical Engineering, Mechanical Engineering, Material Science, or related field preferred but others will be considered depending on qualifications. Proficient verbal and written communication skills to collaborate effectively in a team environment and present and explain technical information.

Contact: Please send resume, salary expectations, and references to jwilliams@sensonics.com. Excellent benefits and retirement program. Sensonics International is an equal opportunity employer.
