

**NIH CHEMOSENSORY TRAINING GRANT PROGRAM (CTP)
A CELEBRATION OF NEUROSCIENCE & CHEMICAL SENSES RECRUITMENT
SYMPOSIUM**

April 20-21, 2026

Application Deadline: February 1, 2026

FOR FULL INFORMATION AND REGISTRATION: <https://opda.fsu.edu/fellowships-and-awards/postdoctoral-fellowships-and-stipend-support/nih-chemosensory-training>

We are seeking PhD candidates and early-stage postdoctoral scholars interested in applying for postdoctoral training (starting in 2027) at Florida State University with one of our 8 chemosensory faculty preceptors.

We will select 5 applicants to visit our campus for our celebration symposium in April, where they will provide an oral presentation of their ongoing research and share their training/career goals. Invited guests will be joined by four of our alumni, current trainees, and faculty preceptors to experience firsthand how we mentor junior scientists to become competitive independent researchers and specialist professionals. Guests from the statewide Florida Smell and Taste Institute will join our current trainees for an accompanying poster session showcasing ongoing research.

As a 30-year program at Florida State University, we are eager to mentor a new cohort of scholars starting in 2027.

Please contact Debra Fadool (dfadool@fsu.edu) with any questions about this opportunity.

We hope to meet you this spring!
