

Postdoctoral Fellow Position

Monell Chemical Senses Center: Tizzano Lab

Location

Philadelphia, PA 19104

Open Date

Jan 17, 2019

Description

Dr. Marco Tizzano's laboratory at the Monell Chemical Senses Center is now accepting applications for a Postdoctoral Fellowship position beginning in January 2019. The Monell Chemical Senses Center in Philadelphia is a world-renowned institute focusing on taste and smell research. It is closely associated with the University of Pennsylvania and provides a highly vibrant, collegial and intellectually stimulating environment.

Harmful compounds and xenobiotics carried in inhaled air or ingested food continually assault the nasal and oral cavities and can cause severe inflammatory conditions. Chemosensitivity of the respiratory and oral mucosae plays an important role in airway inflammation and oral health disorders. Solitary chemosensory cells (SCCs), specialized chemosensitive sentinel cells of the epithelial mucosa, respond to bitter-like chemicals and bacterial metabolites by triggering inflammatory and behavioral protective mechanisms. As such, fundamental questions arise as to how animals sense dangerous compounds and bacterial infection and how the mucosal immune system interact with epithelial cells to control pathogens. Using multiple approaches ranging from genetics to molecular biology, imaging, physiology, electro-physiology and behavior, the Tizzano's lab aims to address the molecular and cellular mechanisms of SCC function as a mucosal protective element and its interaction with the immune system to promote elimination of the pathogen.

Qualifications

The Tizzano's lab is seeking a highly motivated postdoctoral fellow interested in studying the mechanisms and the function of SCCs and the interaction with the immune system in the protection of nasal and oral mucosae. Applicants are required a Ph.D. degree. Candidates with expertise in immunology, electrophysiology, imaging, and molecular and cell biology are highly encouraged to apply for this position.

Application Instructions

Interested applicants should submit the following documents to <http://apply.interfolio.com/59642>

- A cover letter describing your research interests, goals, and how you would integrate your interests to the Tizzano's lab research focus.
- A curriculum vitae.
- The contact information of *three* references

Application Process

This institution is using Interfolio's Faculty Search to conduct this search. Applicants to this position receive a free Dossier account and can send all application materials, including confidential letters of recommendation, free of charge.

Equal Employment Opportunity Statement

Monell Chemical Senses Center shall abide by the requirements of 41 CFR §§ 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, or national origin. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, national origin, protected veteran status or disability.
